

GLASS FLOORING

ion

■ GLASS FOR LIFE

Glass flooring provides a structural glass solution to increase the flow of light into a property, opening up internal spaces and basements.

Our wholly bespoke service offers maximum flexibility to create a wide range of flooring to meet your individual requirements. Suitable for commercial or residential properties, church or heritage buildings.

- Open up internal spaces and add light and space
- Let light flow into basement or below ground developments
- Non-slip surfaces
- Fully opaque surfaces for privacy
- Frameless designs for a contemporary and minimal result
- Individual, bespoke metalwork and fixings
- Circular or non-standard shapes available
- Fully compliant with all relevant building and conservation regulations

Subject to individual requirements and compliance Ion Glass bespoke glass floors can be specified in a choice of glass finishes, sizes and metalwork options including:

- Clear float glass
- Low iron extra clear glass
- Sandblasted or partially sandblasted glass for an opaque or non-slip finish
- Single or double glazing
- Tinted glass
- Bespoke metal frames individually commissioned or manufactured by Ion Glass.
- All visible metalwork can be specified in polished, brushed or powder coated finishes.

We offer individual, location specific advice on the appropriate framework, fixing methods, glass size and glass specification to meet structural considerations.

Unrivalled Service

All projects are surveyed and templated as required to confirm the design, layout, initial measurements and to check and discuss building abutments. All our installations are carried out by fully trained and experienced Ion Glass technicians, using appropriate lifting mechanisms as necessary. Ion Glass guarantees that all our flooring installations meet or exceed the appropriate loading requirements.

To discuss your project with our team of experts contact us by phone or email.
