■ GLASS FOR LIFE

An Ion Glass structural glass linkway is an ideal solution to link two buildings, or connect an older or heritage building to a new extension.

Visually attractive and totally weatherproof our bespoke linkways improve light flow as well as providing the optimum, wholly compliant interface. Consider the benefits of an internal glass link or glass bridge too!

- Add light and space between buildings
- Frameless designs for a contemporary and minimal result
- Use bespoke structural glass fins or beams
- Choose single or double glazing to meet heat loss requirements
- Install an internal glass linkway
- Link two areas or buildings with a glass bridge.
- Individual, bespoke metalwork and fixings
- No height or size restrictions
- Minimal footings required
- Fully complaint, meeting heritage and building regulations

**Ion Glass bespoke linkways can be specified in a choice of glass options and fixing methods including:**

- Clear float glass
- Low iron extra clear or tinted glass
- Sandblasted glass for an opaque finish
- Single or double glazed
- Switchable glass options available
- Single panels of glass or a series of linked glass panels to create a structural glass solution to your specific dimensions
- Structural glass fins or beams for minimal metalwork
- Specialist metalwork and bespoke metal frames are commissioned or manufactured by Ion Glass.
- All visible metalwork can be specified in polished or brushed stainless steel; powder coated mild steel finishes available

We offer individual, location specific, technical advice on the appropriate fixing systems, glass size, glass thickness and specification.

**Unrivalled Service**

All projects are surveyed to confirm the design, layout, initial measurements and to check and discuss building abutments. All our installations are carried out by fully trained and experienced Ion Glass technicians, managing logistics and lifting requirements throughout.

To discuss your project with our team of experts contact us by phone or email.
